LIFT TABLES
LIFT—a stylish and versatile line of height-adjustable tables designed to enhance the way you work. Whether you're collaborating with colleagues or focusing on individual tasks, **LIFT** adapts to your needs with ease. Perfect for workstations, private offices, or conference rooms, **LIFT** lets you transition smoothly between sitting and standing, promoting comfort and productivity throughout your day. Available in single or connected configurations, **LIFT** offers the flexibility, privacy, and technology support you need—all in a sleek, modern design.

LIFT POWER BEAM
Designed to complement the **LIFT** height-adjustable table system, **LIFT** Power Beam brings power and data access right where you need it—making your workspace more flexible, efficient, and future-ready. Available in a variety of configurations including linear, 90°, 120°, and 180°, it supports a wide range of layouts for open-plan environments. Optional built-in wire trays keep cables neatly managed, while the beam can be customized with fabric, glass, or PET screens to enhance privacy and style. With **LIFT** Power Beam, creating a clean, connected, and customizable workspace has never been easier.

LIFT DOUBLE BENCH
The **LIFT** Double Bench brings added structure and clarity to today's modern office. By connecting individual workstations in a unified layout, it maintains the integrity of the original open- plan design while introducing subtle division and organization. This configuration is especially popular for segmenting large spaces into dedicated teams or departments—offering both collaboration and a sense of belonging. For added focus and comfort, privacy screens can be mounted directly on the central power beam or attached to the worksurfaces, giving users the flexibility to define their personal workspace without closing off the environment.

NUTS & BOLTS

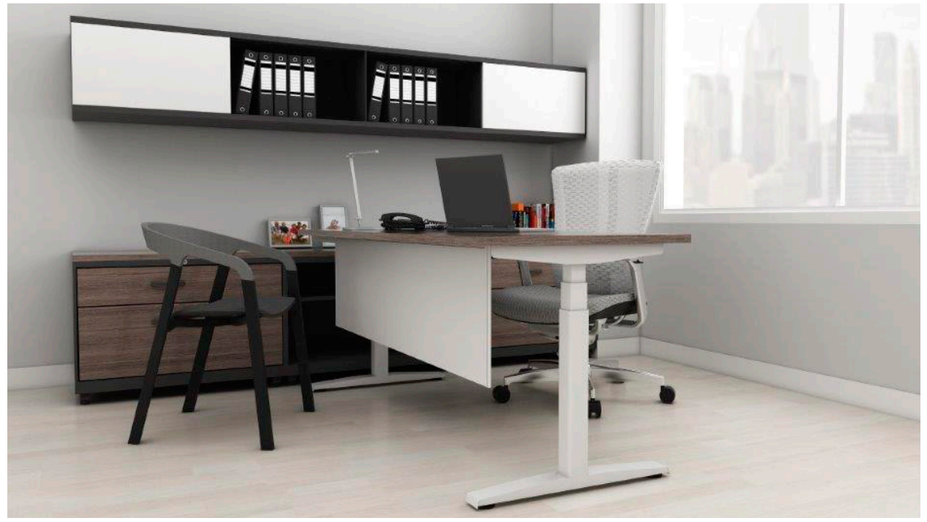

Beneath its sleek exterior, the **LIFT** Table is powered by advanced engineering designed for smooth, reliable performance. Straight desks feature dual motors, while L-shaped configurations use triple motors— delivering fast and effortless height adjustments at a speed of 1.5 inches per second. Each table is equipped with precision 2 or 3-stage columns and solid-state controls that ensure a soft start and stop, keeping the movement synchronized and steady. Choose between two control switch options: the Standard Control, for simple up/down operation, or the Memory Control, offering 3 or 4 programmable height settings along with customizable upper and lower limits for personalized comfort. For added safety, every **LIFT** Table includes an Anti-Collision System, designed to prevent injuries and protect nearby objects during height adjustments—so you can focus on your work with confidence and peace of mind

HEIGHT ADJUSTABLE WORKSTATION

The workplace is no longer static— and neither should you be. Switching between sitting and standing throughout the day has well-proven health benefits, from improved posture to increased energy and focus

PRIVATE OFFICE

LIFT Tables are designed to feel at home in any setting—from open-plan workspaces to the refined atmosphere of a private office. As the traditional executive office evolves into a more flexible, functional environment, **LIFT** offers the perfect blend of sophistication and adaptability. With clean aesthetics and ergonomic performance, **LIFT** seamlessly supports the modern professional's need for comfort, movement, and style—bringing a fresh perspective to the classic private office.

VARIETY OF APPLICATIONS

LIFT Tables are designed to support this movement, seamlessly blending into modern office environments with their clean lines and ergonomic functionality. Whether for individual workstations or collaborative spaces, **LIFT** brings flexibility, comfort, and wellness into your daily workflow.

SEAMLESS INTEGRATION

LIFT Tables offer unparalleled versatility, coming in a wide array of shapes and configurations—from straight and L-shaped to 120-degree designs, and many more. This extensive variety ensures that there's a **LIFT** Table perfectly suited for virtually any application, allowing for effortless integration with the ODS Crossroads system. This seamless compatibility significantly enhances the functionality and efficiency of any modern workspace.

LIFT POWER BEAM

LIFT POWER BEAM

Designed to complement the **LIFT** height-adjustable table system, **LIFT** Power Beam brings power and data access right where you need it—making your workspace more flexible, efficient, and future-ready. Available in a variety of configurations including linear, 90°, 120°, and 180°, it supports a wide range of layouts for open-plan environments. Optional built-in wire trays keep cables neatly managed, while the beam can be customized with fabric, glass, or PET screens to enhance privacy and style. With **LIFT** Power Beam, creating a clean, connected, and customizable workspace has never been easier.

LIFT POWER BEAM

OPTIMIZING MODERN OFFICE LAYOUTS WITH LIFT POWER BEAM

LIFT Power Beams offer a range of configurations, including straight, 90-degree, and 120-degree angles, enabling the creation of diverse and dynamic workstation layouts. This versatility is crucial for moving beyond conventional, uninspired office designs, fostering an environment where employees can truly thrive. By providing adaptable solutions, **LIFT** Power Beams contribute to more engaging and productive modern workspaces.

LIFT POWER BEAM

VERSATILITY & FUNCTION

Enhancing Work Environments with ODS Power Beam Beyond its primary function of seamlessly delivering power, voice, and data solutions to modern workstations, the ODS Power Beam significantly enhances the work environment by offering personal privacy solutions. These solutions come in a variety of materials, including fabric, PET, glass, and acrylic, and are available in diverse heights, shapes, and colors to suit various aesthetic and functional preferences.

LIFT DOUBLE BENCH

LIFT POWER BEAM

The **LIFT** Double Bench brings added structure and clarity to today's modern office. By connecting individual workstations in a unified layout, it maintains the integrity of the original open- plan design while introducing subtle division and organization. This configuration is especially popular for segmenting large spaces into dedicated teams or departments—offering both collaboration and a sense of belonging. For added focus and comfort, privacy screens can be mounted directly on the central power beam or attached to the worksurfaces, giving users the flexibility to define their personal workspace without closing off the environment.

LIFT DOUBLE BENCH

ENHANCED PRIVACY SOLUTIONS WITH LIFT DOUBLE BENCH

Thanks to their rigid, strong construction, **LIFT** Double Benches can accommodate screens taller than standard height. These screens can be mounted in a fixed position on the central beam for stable privacy. For even greater flexibility and personalized privacy, screens can also be affixed directly to the desk worksurface, allowing them to move independently with the desk.

LIFT DOUBLE BENCH

EFFICIENT POWER, VOICE, AND DATA DISTRIBUTION WITH LIFT DOUBLE BENCH

The **LIFT** Double Bench effectively addresses the contemporary demands for power, voice, and data distribution. It features an integrated BYRNE 8 TRAC power system, which incorporates a robust four-circuit, eight-wire electrical infrastructure. External cabling is neatly managed by directing it into standard cable trays, ensuring it remains off the floor and discreetly positioned beneath the worksurface.

LIFT DOUBLE BENCH

STYLE & FUNCTION

The **LIFT** Bench collection provides an extensive array of options to customize individual working environments.
These choices range from multiple storage solutions and end privacy panels to a diverse selection of screen dividers. The screen dividers themselves offer versatility, including fixed or freestanding configurations and materials such as tackable fabric, glass, or PET, all available in a wide spectrum of colors.
