COMO

bristol

We simply could not take our eyes off the sleek, scintillating form. We reach out to touch it, to run our hands against its taut, resilient yet supple surface and cannot keep our hands away. We throw ourselves onto it, only to be cradled perfectly, our every anatomy caressed and comforted. We wonder how perfect a chair can be and without doubt and with absolute ease, we concurred.

COMO comes very close to perfection

COMO RIB

Our eyes have a natural tendency to seek beauty. COMO RIBBED has an alluring beauty that transcends time and place, perhaps even rational thinking. Far beyond fleeting first impressions, visual recollections of its compelling organic lines and contours linger on ceaselessly, never diminishing with time, to fuel, drive and ultimately satiate our innate need for aesthetic pleasures.

Perfectly parallel horizontal lines are stitched on soft aniline leather and a base of reinforced membrane with a polyurethane foam core creating unique rib contours that ripple majestically along the entire chair.

In the end, we shall sit on resilient columns of air
Marcel Breuer

Not quite, but not far fetched either. AIRWEAVE™, a high performance woven mesh exclusive to COMO AIRWEAVE™, is virtually 50% air. Where air is woven into structure, transparency, lightness and mimicry of biological breathing membranes cohese to deliver an ethereal experience significantly greater than the sum of its parts.

COMO AIR™

Once again, less is more. COMO AIR™ seduces with maximum performance using minimum material. COMO AIR™ flirts in an almost transparent manner with every body contour and movement yet remarkably maintain and retain it original shape, defying time and physics.

Gram for gram, AIR™ is one of the strongest upholstery material available. Woven mesh have widespread commercial application from scientific apparatus to sportswear, and more recently for furniture upholstery.

COMO PAD

Dignified and luxurious, COMO PADDED suggest upper class sensibilities combined with modern day pragmatism. The high degree of craftsmanship required to sew and upholster COMO PADDED recalls the respected bespoke tradition of tailoring each piece produced to near perfection and highlights just how remarkably COMO interprets age old tradition to benefit the modernist form.

Plump and inviting, the pads are hand sewn with French stitching on carefully selected aniline leather of the softest nature, with each pad judiciously filled by hand with polyester encapsulated foam to ensure only pads with perfect crowns are made.

Sophistication lives here. Slim, supple yet relaxed, COMO LINE™ captivates with charm and grace of a confident dancer moving in line with rhythm. Deliberately simple yet bold moves, perfectly executed corner tucks and a soft yet firm landing ensures a performance that comes close to perfection.

COMO LINE™ takes inspiration from LINEA™ chair, introduced by Bristol since 1993 and a highly popular chair till today, a chair which features the unique upholstery technique of 'not too tailored' quilti
