CROSSROADS
benching solution

Crossroads by ODS is a comprehensive office furniture system designed to address the needs of today's and tomorrow's office.
Based on a core frame and tile platform and drawing from the legacy of classic systems furniture, Crossroads offers extensive choice of components and can be built upon, extended or fully reconfigured in response to changing demographics, advances in technology and evolving work patterns.

Crossroads foundation is 3 inch frame and tile panel. Used in combination with 1 inch segmented divider panels, legs and screens from new X-Bench system, Crossroads migrates with ease from traditional cubicle lay-outs, to modern benching set-ups to contemporary private offices and conference rooms concepts.

Adaptable and scalable, Crossroads allows you to make any office space your own office in style and on the budget.

Crossroads offers a mix of materials that contribute to aesthetics, function and sustainability goals of modern office. Metal storage components have a light, clean look and offer a range of attractive finishes. Wood doors bring an upscale look to a metal cabinet case.

Crossroads makes it possible to create the exact workplace required. Vertical surfaces are available as a whiteboard, tackboard, accessory tool rail, wood, laminate, glass and metal.
Worksurfaces are ergonomically designed to support workflow pattern. Broad range of storage units can satisfy any storage demands.

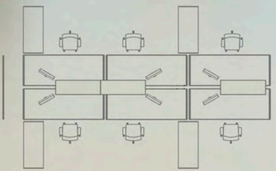

TOP VIEW

Crossroads embraces benching trend of modern office by introducing new planning concepts and capabilities. It can do it on its own or interacting with X-Bench - the most recent addition to ODS family.

X-Bench was designed with advanced workplace knowledge to span a wide range of applications and to support the most dynamic work environments. X-Bench elements can be seamlessly integrated with Crossroads systems components to build an open office benching configuration, or can be used as a stand-alone benching system to create free-standing application.

As organizations become more collaborative and workers spend more and more time in teams, workplaces are evolving to support interaction. Still, individuals often require varying degrees of privacy throughout the day and across projects. X-Bench caters to these shifts in workstyle to enhance user performance, productivity and satisfaction. A variety of functional up-mounted storage units and dividing screens is part of X-Bench package.

X-Bench worksurfaces are available in strategic shapes, including 120-degree set-ups, support unique workstyles, job functions, and preferred orientation. X-Bench allows for a breadth of office settings.

Here, in a simple benching configuration, translucent screens define boundaries and allow users a degree of privacy and at the same time facilitate group interaction.

Crossroads creates transitional configurations that combine the space-division benefits of a panel-based system with flexibility of benching.

Accents energize a work space. Vivid colors applied to Crossroads or X-Bench screens and segments identify and distinguish work area, or brand and bring life to office landscape. A wide variety of screen options, including frosted and clear glass, tackable fabric, laminate and wood, placed along the spine or laterally, provides opportunity for effective use of color accents.

X-Bench transitions with ease from a busy collaborative environment to a tranquil managerial setting. With simple, flexible design that naturally assimilates to the task or application at hand.

TOP VIEW

From open space collaborative areas, to semi-private settings for focused teams to a modern corner office, Crossroads and X-Bench strike a balance between the needs of the user and those of the organization.
